

Small choice. Big change.

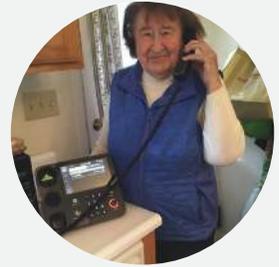

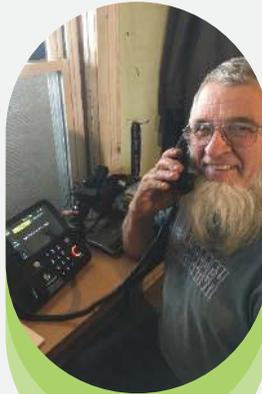

The positive impact of CaptionCall.

CUSTOMER STORIES

OF OUR CUSTOMERS

and many, many more.

"My hearing is so bad I almost gave up answering calls in the past, but with my new CaptionCall phone, the sound quality along with captioning is fantastic!"

Dehalas, *Shingletown, CA*

"The CaptionCall phone is the best thing I have ever found to make and receive phone calls. I recently found out that you had a caption call mobile App for the iPad. IT'S WONDERFUL!!!! Installed it and it works GREAT. Now I can receive phone calls when out and traveling."

Bob, *Englewood, FL*

"I'm only 41 but have had Meniere's disease and hearing loss since I was 19. In the past 10 years my hearing has gotten to the point that I was unable to use the phone. I settled for texting, emailing, or messaging my family and friends. When I got CaptionCall, the first phone call I made was to my mom. For a moment, she didn't realize who she was speaking to since it had been so long since she'd heard my voice on the phone! Thank you for helping me feel comfortable using the phone again!"

Erin, *Pekin, IL*

"I have been wearing hearing aids for about 8 years. Until I got CaptionCall, I had to go to my daughter's home and have her make calls for me when I needed to take care of business over the phone. Not anymore! I no longer have to bother my daughter; that makes me feel more like my old "independent" self. Thank you, CaptionCall, for helping me get that back."

Jack, *Houston, TX*

"I was not able to use the telephone for several years. Calls went unanswered because of my hearing loss. New, expensive hearing aids did not help. I had given up using the phone completely. When CaptionCall informed me that I could get a CaptionCall phone I was somewhat skeptical. This phone made all the difference. I now answer the telephone without a problem and again feel connected to the world."

Hank, *Romulus, MI*

"For me the biggest advantage is that CaptionCall works with both my hearing aid types. What I've found here is a miracle for me. I can live more of a normal life. Without the hearing aids I hear nothing. The text on the CaptionCall phone is still important because understanding some people is difficult."

John, *Reading, PA*

“I am so happy to be able to communicate with my family. They are so used to not calling me, I had to remind them and show them the unit. AMAZING! Totally grateful for opening up conversations. Tears of JOY... thank you so much.”

Mary, *Decatur, IL*

CaptionCall is available in the United States ONLY. FEDERAL LAW PROHIBITS ANYONE BUT REGISTERED USERS WITH HEARING LOSS FROM USING INTERNET PROTOCOL (IP) CAPTIONED TELEPHONES WITH THE CAPTIONS TURNED ON. IP Captioned Telephone Service may use a live operator. The operator generates captions of what the other party says. These captions are then sent to your phone. There is a cost for each minute of captions generated, paid from a federally administered fund. No costs are passed along to individuals who qualify for the service. The CaptionCall phone remains property of CaptionCall in order to provide ongoing support, service, and upgrades.
